- **NAV:** 99.30%
- **Annual management charge (AMC):** 0.75%
- **Estimated total expense ratio (TER):** 0.97%
- **ISIN:** LU1440702675
- **SEDOL:** BD87QV6
- **Bloomberg code:** CBKMWSP LX

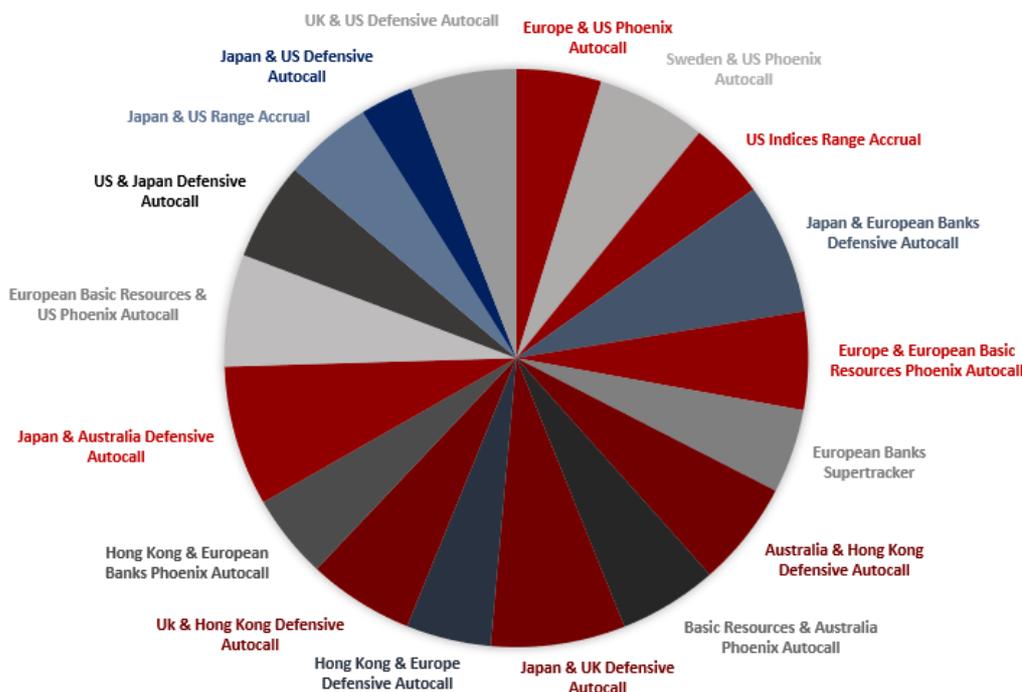

**MONTHLY COMMENTARY**

The fund's NAV decreased by 5.16% in May, reducing the year-to-date increase to 8.88%. This decrease was caused by a general decline in equity markets due to concern over the trade war between the US and China and its knock-on effects. However, despite this decline, one structured product held by the fund matured early and paid a return of 11.5% over 1.25 years (9.44% per annum). This structured product was linked to the performance of the Australia benchmark equity and European benchmark equity indices. This return was achieved even though the European benchmark was up 0.47% and the Australian has only increased by 7.58% since February 2018.

**INVESTMENT OBJECTIVE AND INVESTMENT SELECTION**

The fund's objective is to return an average annual return of cash (3m GBP LIBOR) plus 6% over a rolling three-year period, with a volatility lower than the leading benchmark equity indices. This return will be achieved by investing in a diversified portfolio of structured products.

**PORTFOLIO DETAILS**

**Structured Products Fund: FAQs**

**1. What would the return be on the fund's existing portfolio if markets stayed at their current levels, and when would this be achieved?**

The return would be 31.7%, with a weighted average time to maturity of 3.24 years.

**2. What is the smallest index move that would cause a structured product held by the fund to lose money? When would this occur?**

The European Banks Equity Index would have to fall by 4.93% and be below this level at the close on 15 December 2023 for this structured product to realise a loss of capital. The average index fall required is 28.47% from current levels.

**3. How many of the structured products held by the fund would pay their maximum return if markets stayed at their current levels?**

Of the 19 trades held by the fund, 17 would pay their target return with indices at their current levels. The remaining two trades would pay an average annualised return of 4.48%.

**For Mattioli Woods plc's clients only**

The fund currently holds 19 structured products. The proportion invested in each structured product is shown in the pie chart above. The portfolio is not dependent on these indices going up to increase the NAV of the fund. Instead, the fund will benefit from a combination of these indices increasing, falling or moving sideways over the short to medium term.

## FUND EXPOSURE

The **top 10** holdings of the fund are shown below. For this exposure calculation we multiply the amount invested in each structured product by the sensitivity to the change in the index level and then divide this number by the AUM. Therefore, the greater the amount invested in the structured product, and the greater the sensitivity, means the structured products listed below will have more effect on the NAV of the fund.

NAME	PERCENTAGE OF THE FUND
Japan & European Banks Defensive Autocall	7.66%
Japan & UK Defensive Autocall	7.50%
Australia & Japan Defensive Autocall	6.96%
UK & Hong Kong Defensive Autocall	5.62%
Hong Kong & European Banks Defensive Autocall	4.96%
Australia & Hong Kong Phoenix Autocall	4.92%
European Banks & Hong Kong Phoenix Autocall	4.87%
Australia and Basic Resources Phoenix Autocall	4.20%
US & Basic Resources Phoenix Autocall	4.19%
US & Japan Defensive Autocall	3.51%

The fund is now **96.17%** invested in individual structured products. Full details of the fund's holdings can be found on our website: [www.structuredproductsfund.com/current-market-exposure](http://www.structuredproductsfund.com/current-market-exposure).
